PROJECTS

Ride-sharing website for college campus

April 2024

Tech stack: React JS, JavaScript, Node JS, MongoDB, Multer, Express, HTML, and CSS.

[Live link](#)

- Implemented a practical solution by utilizing empty seats in college students and staff members' vehicles, enabling seat reservations through our travel website to aid individuals in need.
- Developed a dynamic website from scratch using the MERN stack, implementing authentication, authorization, and CRUD operations for seamless user interaction and data management.
- Used Multer to implement image uploading functionality.

Blogging website

January 2024

Tech stack: Redux Toolkit, React Js, JavaScript, HTML, CSS, Node Js, and MongoDB.

[Live link](#)

- Developed a fully responsive website for blog writing using the MERN stack.
- Implemented state management with Redux Toolkit for efficient data handling.
- Implemented user authentication for secure access and developed protected routes to enhance security and functionality of a full-stack blog writing website.

CERTIFICATION

- Trained and Certified in Frontend development by Cipher School.
- January 2023
